

Broadcasters think they own the airways and think everyone should pay them to use what they recieved free from the FCC. There needs to be FAIR and BALANCED competition between the broadcasters and the satellite providers who give us much better programing in digital sight and sound without commericals most of the time and not all on others. I pay a subscription fee each month for what I want and the services that are provided to me for those fees. In my opition the broadcasters just think they have to have it all or have to be paid for something they get for free. If they were providing the same service the satellite companies were providing, then I could see their point, but they aren't. The broadcasters are just plain and simpley GREEDY. This just isn't XMradio's fight, Its the whole SATELLITE INDUSTRIES FIGHT! and they all need to get involved together and fight these broadcast companies who think they have to control everybodies entertainment outlets. So, in conclusion to my rant, let the satellite providers alone to provide what they're paying customers want by paying they're monthly fees for programing and tell the broadcasters and they're lobbyists to mind they're own business and practices and "AND TAKE A LONG WALK ON A SHORT PIER." And let the rest of us choose what we want to watch and listen to how ever we choose to. THE BROADCASTERS ARE NOTHING BUT GREEDMISTERS AND NEED TO BE PUT IN THEY'RE PLACES AFER ALL THESE DECADES HAVING IT ALL TO THEMSELVES WITH NO COMPETITION AND NOW THEY'RE AFRAID BECAUSE THEY DON'T HAVE THE PROGRAMING TO COMPETE! AND THAT TERIFIES THEM!
